

Be A Light

I see the light and it's bright as day
I see the light and it shows the way
No more darkness, now I see
Love light shines in you and me

Be a light, light shining bright
Be a light, light day or night
Be a light, light shining bright
Love light, shining bright

We see the light and it's bright as day
We see the light and we're on our way
No more darkness do we see
Love light shines in you and me

Be a light, light shining bright
Be a light, light day or night
Be a light, light shining bright
Love light, shining bright

Be a light, light shining bright
Be a light, light day or night
Be a light, light shining bright
Love light, shining bright

Be a light, light shining bright
Be a light, light day or night
Be a light, light shining bright
Love light, shining bright

Be a light, light shining bright
Be a light, light day or night
Be a light, light shining bright
Love light, shining bright
